1 Overview

The platform offers a suite of Print Apps designed to bridge master data management with digital publishing, enabling organizations to transform structured data into high-quality PDF documents that meet diverse business requirements.

Print solutions on the marketplace (for example, PDF Generator App) allow users to pick from predefined templates or create custom layouts, then export PDFs populated with entity details, associated attributes, and relationship information. By leveraging MDM as the single source of truth, these apps ensure that every document—whether a product catalog, technical datasheet, compliance report, or marketing brochure—uses up-to-date, accurate data in a consistent format.

Note: *This course follows a structured "Tell Me, Show Me, Try Me" learning approach, ensuring a comprehensive understanding of all key concepts through guided instruction, visual demonstrations, and hands-on practice.*

2 Objectives

This Marketplace App training will provide a comprehensive understanding of:

- **The importance of each app** and its role in the ecosystem.
- **Key features** that enhance functionality and efficiency.
- **The step-by-step process** for configuring these apps.
- **Real-world business use cases** to demonstrate practical applications.

3 Target Audience

- Business User
- Business Administrator
- System Administrator

4 Subscription

The print apps are available on a paid subscription.

5 Print App

5.1 PDF Generator App – 123 Minutes

- Importance of PDF Generator App
- Overview and Key Features of the PDF Generator App
- Configuration of the PDF Generator App
- Application demo on how to generate PDF using templates based on the business requirements.
- Generate PDF for single entity
- Generate PDF for multiple entities
- Application demo on how to add custom ODT template
- Application demo on how to generate PDF with custom image renditions
