1 Overview

The App SDK Learning Journey (LJ) provides a comprehensive introduction to building and managing applications using an SDK framework. It walks you through the complete development journey—starting from understanding the SDK's purpose and setup requirements, to creating both UI and Batch applications, and finally learning how to monitor performance and manage data operations.

Additionally, this journey will help understand how to structure and deploy UI applications, configure and execute Batch processes, and understand how these two facets work together in an integrated environment. This LJ also introduces key concepts related to metrics—why they matter, how they are defined, and how they support monitoring and operational decision-making.

In addition, the training covers essential import and export workflows, helping understand how data moves in and out of the system and how to perform these operations efficiently.

Overall, it is designed to give learners the skills and confidence to work effectively with an SDK, build reliable applications, and manage the associated data and operational processes with clarity and best practices.

2 Objectives

By the end of this journey, you will be able to understand the following:

- **Introduction to App SDK & Onboarding:** Understand the purpose, lifecycle, prerequisites, folders, control center functions, and end-to-end onboarding of App SDK.

3 Target Audience

This journey is designed for the following audiences:

- Internals
- Partners/Customer

4 Duration

The duration of this course is 53 minutes.

5 Agenda

5.1 Course 1: App SDK: Foundational Concepts – 53 Minutes

- Explain the purpose and lifecycle of App SDK
- Differentiate UI and Batch facets
- Identify prerequisites and set up the local environment
- Describe the functions of the Control Center
- Explain the App SDK folder structure
- App Onboarding process - User Onboarding; Dev Onboarding and App onboarding

Important note:

- The Introduction to App SDK (101) is a self-enrollable, foundational course.
- This course serves as a prerequisite for the 201 – App SDK Practitioner Learning Journey.
